# Introductory

---

The Publishers herewith present the Eighth Annual Edition of the Regina City Directory. The work has been carried on in the same careful manner by trained and experienced men and we believe we have produced a Directory to the exacting requirements of the business community and the public.

The advertisement department in the front together with the classified section in the back of this Directory contains an alphabetical list of all articles made and sold in Regina and virtually makes it a catalogue of the city which forms a most complete Buyer's Guide.

Canada with every nation is passing through a time of stress and tribulation in this World's disaster. We are taking part in the greatest war of all history. Our citizens from all parts of the Dominion are on active service fighting the battles of the Empire. The loss of so many men having gone with these contingents together with the great number of British and reserves of all the Allies, have drawn from our cities, and it is quite natural to expect that the Directory would reflect this loss and be smaller on that account and contain less names.

The publishers desire to thank their patrons and the general public for the unfailing courtesy shown their representatives and also would say that they appreciate most thoroughly the confidence and satisfaction which the business men of Regina have always shown in them and their work.

**HENDERSON DIRECTORIES, LIMITED,**

Regina, October, 1915.

# City of Regina

---

Regina is situated in lat. 50.30, long. 105, 357 miles west of Winnipeg and 1,125 miles east of Vancouver, and is served by the three transcontinental lines, viz., the Canadian Pacific, the Canadian Northern and the Grand Trunk Pacific Railways.

Regina was incorporated as a city on June 19, 1903, and is now the capital and seat of government of the Province of Saskatchewan. The Parliament Buildings, the erection of which was commenced in the fall of 1908, stands in its own grounds of about 160 acres, south of Wascana Lake and within the city limits.

It has well been said that there are no parliament buildings more dignified or better adapted to the needs of legislative work than those of the Saskatchewan capital.

The building is constructed of Tyndall stone, fireproof throughout, and was erected by Peter Lyall & Sons, of Montreal, at a cost to date of approximately \$1,900,000, the erection being commenced in the fall of 1908, and the departmental offices occupied in the fall of 1910. The length of the building is about 543 feet, and the height of the dome approximately 187 feet. The central portion is 98 feet in width and 267 feet in depth with a wing on either side, each 222 feet long and 72 feet in depth.

The City Council is composed of a mayor and ten aldermen. The mayor is elected annually from a vote of the entire city and at the last municipal election (December, 1914) the aldermen were also elected from the city at large. Prior to that time they were elected annually from the five wards of the city, two representatives to each ward. The by-law making this change was ratified by the electors on August 10, 1914, and provided for the abolition of the ward system and for the reversion to the system of the election of aldermen by a general vote of the electors.

Regina is undoubtedly the financial centre of the province, and its development in this respect is very remarkable. Fourteen of the leading Canadian banks now have branches in the city, several having two, the majority of them having erected substantial and elaborate offices of their own.

Practically every loaning institution of importance in Canada has an office in the city, many of them occupying their own building.

The Bank Clearing House Association was established in 1909 and the clearings for 1911 were \$73,032,088, an increase of 46 per cent. over 1910, placing Regina as the second city in the Dominion in this respect, Edmonton being first with an increase of 70 per cent. The clearings for 1912 were \$115,727,648, showing an increase over 1911 of \$42,695,560. The clearings for 1913 were \$132,087,457, showing an increase of \$16,359,809 over those of 1912, and being the largest turnover the Clearing House has ever recorded. The clearings for 1914 were \$98,205,541.65.

A very large volume of business is transacted in the purchase and sale of bonds and debentures of the municipalities and school districts of Manitoba, Saskatchewan and Alberta, the city being the headquarters of Western Canada for this class of business.

Regina is justly entitled to be termed the best served railway city in Western Canada. Twelve lines of railway radiate in all directions from the city, and the C.P.R., C.N.R. and G.T.P. vie with each other in their endeavor to give Regina an excellent train service, some forty-one passenger trains entering and leaving the city daily.

The Great Northern Railway will have direct communication between Regina, Minneapolis, St. Paul and other southern cities over the G.T.P. Railroad Boundary Line. In addition to the lines in operation, bonds have been guaranteed by the Provincial Government for ten additional branch lines which, when completed, will make a total of 22 railway lines radiating in all directions from Regina. A new Union Depot for the C.P.R. and C.N.R., thoroughly modern and up-to-date in every particular, has been erected and is now in use, but the C.N.R. has acquired considerable property in the east end of the city and it would seem probable that this company will erect a passenger depot of its own in the near future.

The G.T.P. plans under way include the erection of a station, a magnificent hotel, power house, laundry, train sheds and underground tunnel, to cost in all approximately \$2,000,000. The foundation and steel work for the hotel has been started. This investment, made by a company such as the G.T.P., speaks volumes for its faith in the city's future.

Owing to its geographical situation in the heart of the grain growing district of Western Canada and with unequalled railway facilities, Regina is the largest distributing point for agricultural implements in the world, and practically every Canadian and American implement manufacturing firm of any importance has its agency in the city. The advantages for the distribution of other lines of goods are on a par with those for agricultural implements, and Regina has some 36 manufacturing concerns and over 200 wholesale and commercial houses.

As a residential centre, Regina offers every inducement to the homeseeker. In this respect it has been referred to as "the City of Beautiful Homes." The city is a firm believer in municipal ownership and owns its street railway, of which it has some 30 miles constructed within the city limits; light and power plant, supplying cheap light and power; and water system, the water being obtained from springs distant some eight miles. With regard to the two last mentioned utilities, the city has planned the expansion of the present systems so that, when complete, they will provide for a population many times the number of the present one, supply sufficient power and provide adequate fire protection throughout the city.

During the last year the city extended its municipal ownership still further by the establishment of a Municipal Stock Yards on a scale sufficiently large to accommodate all the live stock raised in the province. The yards were opened in September last, and considerable business has been carried on. The ultimate aim of the city, however, is the provision of an up to date stock yard to furnish a good market for all stock raised in the country tributary to the city.

The City's Public Market, under the control of the Local Council of Women, contributes in no small measure to the welfare of the residents of Regina and to the people in the districts surrounding the city, in providing an open market for the sale and purchase of all kinds of supplies at first cost.

In connection with cheap power the city last year entered into an agreement with Messrs. Coste & McAuley for the supply of natural gas. The city intends to arrange for the distribution of the gas within its limits, retaining full control of the utility as it has done with its other utilities.

From the educational and social points of view, the city also offers every advantage. With a population of about 50,000, the city has the Regina College, St. Chad's College and the Provincial Government Normal School, all carried out in Gothic treatment. A Collegiate Institute of classic design and a magnificent College is projected by the Presbyterians, their scheme including the purchase of some three or four hundred acres of ground on which to erect college buildings at a cost of about \$1,000,000, making provision for the education of both sexes, also a hospital and other buildings in connection with same. The Roman Catholics have also expressed their intention of erecting a substantial college. From these points it will be seen that the city, although not fortunate enough to possess the Provincial University, may claim to be the educational centre of the province. In addition to the above, there are some 14 public and separate schools, 23 churches, Y.M.C.A. and Y.W.C.A.; two public and several private hospitals and nursing homes; a public library with two branches; several business colleges and numerous societies for the advancement of art, music, literature and science, one daily morning paper, one daily evening paper, three weekly papers and several monthly trade publications.

As to amusements, the city has a first-class theatre and some five moving picture theatres. The lake adjoining the parliament buildings offers facilities for boating, bathing and skating. Many fraternal societies and other organizations exist, devoted to amateur theatricals, cards, debates, etc. The city is within easy distance of Last Mountain and Katepwa Lakes, two of the beauty spots of the province, and delightful holiday resorts, offering unequalled facilities for bathing, fishing and boating.

Regina is one of the best paved cities in Canada for its size, having some 27 miles of paved streets and  $3\frac{1}{2}$  miles under construction; 75 miles of graded streets; 42 miles of granolithic and 72 miles of plank sidewalks. The city also has 66 miles of sewer with 5,000 connections; 71 miles of water mains with 485 hydrants and 5,830 house connections; 4 fire stations with some 40 firemen and a full equipment of the most modern fire fighting apparatus, some 257 acres of parks, a trunk sewer and sewage disposal works, and an incinerator plant for the disposal of garbage.

Regina's Municipal Buildings would do credit to a far larger city. The funds for their erection have been to a great extent provided by the sale of the townsite lands, yet the city still possesses an asset in its unsold property worth approximately \$3,016,000.

## STREET RAILWAY

In 1910 it was decided to undertake the installation of a street railway system as a municipal enterprise. The council had submitted to the ratepayers the question of granting a franchise to one of a number of companies who applied for it; but, notwithstanding that unusual difficulties would have to be overcome, they decided that it would be undesirable to grant a franchise.

The work of construction was commenced in the spring of 1911 and on July 29, 1912, the first service was instituted, and a constant service has been maintained since that date.

Gross Earnings .....	\$218,915.87
No. of Passengers Carried .....	5,304,447
Car Mileage .....	1,119,309
Rolling Stock: 34 passenger and 30 freight cars; 1 motor haulage car and 2 sweepers.	

## ELECTRIC LIGHT AND POWER PLANT

The electric light and power system is owned and operated by the city. This utility is not only self-sustaining, but revenue producing, showing a surplus of revenue over expenditure of \$19,248.99 in 1914.

The generating plant at old power house consists of four boilers, aggregating 1,000 H.P.

One 300 K.W. generator connected to Corliss engine.

One 450 K.W. low pressure turbine generating unit.

Two 400 K.W. direct current railway units, vertical engine type.

One 1,200 K.W. motor converter, converting from 2,200 volt three phase to 600 volt direct current.

A new Power House is approaching completion, containing the following additional apparatus: Two 1,500 K.W. high pressure turbine generating units; one 3,000 K.W. high pressure generating unit; and 6 boilers, 3,000 H.P. capacity.

Some 581 arc and 50 incandescent street lights are in use.

## WATER WORKS SYSTEM

The water works system is owned and operated by the city. The supply of water is obtained from springs and artesian wells at Boggy Creek, about eight miles north-east of the city. A dam has been built there across the creek at an elevation of about fifty-five feet above the city, which impounds about one hundred million gallons of water. Forty-five wells have been sunk through the clay to the gravel bed, found at an average depth of one hundred feet. In addition to the

above, pipe lines have been laid in the valley to collect and convey the water to Barton Pump Well (capacity 270,000 gallons). Adjoining the pump well is located a pumping station in which two 80 h.p. gasoline engines and two belt-driven turbine pumps raise two million gallons per day into the circular reinforced concrete five million gallon reservoir on Tor Hill, which stand about one hundred and twenty feet above the city. The storage reservoir was designed by Mr. R. O. Wynne Roberts, Consulting Engineer, and is two hundred and two feet in diameter, depth of water being twenty-five feet. These different works are connected with the city by one fifteen-inch vitrified pipe line, ten-inch cast iron mains, and one eighteen-inch steel main. These trunk mains are capable of delivering by gravitation at the Power House about four and one-quarter million gallons per day. It is proposed shortly to lay another twenty-seven inch steel trunk main between Tor Hill Reservoir and the city, and this will deliver another 5 million gallons per day. This main will also serve to convey water from the watersheds adjacent to and twice the area of Boggy Creek, when the demand for an increased supply of water requires same. About half way between Tor Hill Reservoir and the city there are two reservoirs having a combined capacity of 1,065,000 gallons, and at the city power house there are two more holding 650,000 gallons.

When the pressure is below standard the water when it reaches the power house, is pumped into the city mains by means of a new five million gallon steam-driven turbine pump and two horizontal direct action pumps and when installed the total capacity will be 8,600,00 gallons per day. The normal domestic pressure in the city is fifty pounds per square inch, whilst for fire purposes the pressure is increased to one hundred and twenty pounds. A system of trunk mains throughout the city, ranging from 27 inches to 10 inches in diameter was laid in 1913, which will adequately provide for any possible development for a number of years and afford complete fire protection in every part of the city. The greater part of this scheme has already been carried out and the balance of the work will be undertaken this year.

## ANNUAL FINANCIAL STATEMENT

The City of Regina at the end of 1914 had: Assets, \$21,178,044.91; Liabilities, \$12,054,940.87; Surplus Over Liabilities, \$9,123,104.04.

## BANK CLEARINGS

The clearings for 1914 were \$98,205,541.65.

## PARKS

In different parts of the city grounds have been laid out for cricket, football, baseball, lacrosse and tennis, while the city has about 257 acres for park and recreation purposes, valued at \$3,300,000. A splendid feature of the city is the children's playgrounds, located in different parts of the city.

**Wascana Park**—Containing about 45 acres and situated to the south of the city, has a frontage of about a quarter of a mile along Wascana Lake, which extends for nearly two miles east, affording excellent facilities for boating, of which full advantage is taken. There is a large boat club building and a boat livery in the park. There is also a bathing house, which is open for the use of the public.

This park, adjoining as it does the grounds of the Regina College, and having an outlook over the lake to the Parliament Buildings and grounds, offers excellent facilities for development as an ornamental park.

**Victoria Park**—Which contains over seven acres, situated in the centre of the city, is laid out as an ornamental garden.

**Dominion Park**—Containing about eight acres, is devoted to athletic games. It is in the centre of the warehouse district and affords exceptional advantages to men employed in the district and to the athletic and sporting element of the public generally.

**Alexandra Park**—Is used as a children's playground and is equipped with suitable gymnastic apparatus.

# University of Saskatchewan

The University is situated on the east side of the south branch of the Saskatchewan river. Its site comprises 1,333 acres. About 300 acres, with frontage of over half a mile on the river, have been set apart for a campus. A portion of the quarter section south of the campus is devoted to plot work, the land being virgin prairie.

A general plan of the campus, making ample provision for future growth, is being prepared. In the preparation of this plan advantage is being taken of the experience of state universities with problems similar to those of this University. In the erection of buildings it was thought wise to begin with a number of small buildings adequate to present needs, but capable of being adapted to special purposes without serious waste and at small cost when the growth of the University requires greater specialization in buildings.

The College building is about 220 feet long and 52 feet wide with wings of about 111 feet in length and 30 in width. At the rear is a large hall capable of seating between 500 and 600 people. This building will be used for teaching purposes in Arts and Agriculture. It is located in a position convenient to the Agricultural, Engineering, Horticultural and Dairy buildings, the Stock Pavilion and Farm buildings so that in time it may be devoted exclusively to the College of Agriculture. Near it are placed the Residences for students.

The College of Arts and Science offers courses leading to the Bachelor's and Master's degrees in Arts, the Bachelor's and Master's degrees in Science, the Bachelor's degree in Civil Engineering, the Bachelor's degree in Accounting; also courses preparatory to professional courses in Medicine, Pharmacy, Divinity and Teaching. Other courses, not leading to a degree but adapted to the needs and tastes of the student are offered.

In order to obtain a degree a candidate is required to pass the Junior or Senior Matriculation, to attend the classes and pass the examinations prescribed in the Calendar. The course for the Bachelor's degree extends over four years for candidates who have passed the Junior Matriculation.

## COLLEGE OF AGRICULTURE

The College of Agriculture is a part of the University and stands in the same relation to the University as does the College of Arts and Science. It has a number of buildings planned and equipped for carrying on its particular work and a staff of its own for the purpose of giving instruction especially in the technical subjects and elementary work in English, Mathematics and the Sciences. Its laboratories and equipment are under certain limitations and restrictions, available to students in the other Colleges of the University for the purpose of scientific research.

The aim of the College is to give the students under its care a good, practical training in the different technical subjects that bear upon the various phases of agriculture, such as animal husbandry, field husbandry, farm mechanics, farm engineering, dairying, horticulture, tree planting and others; to give them a good, liberal education in various other branches such as will enable them to adopt themselves readily, without great loss of time and energy, to new and varied conditions, and to fit them for their duties as good citizens.

The University estate consists of the campus, about 293 acres, and the College Farm, 1,040 acres. The College Farm proper consists of 880 acres.
